WHY STILO?

The name Stilo comes from the tool used by the Bronze Age to write, to imprint their first thoughts, their first ideas, their first concepts.

In time the word "stilo" evolved to "style", that is the way each person uses a stilo: your own style.

And our style is that of making products that leave a mark, exactly like a stilo in our ancestors wax boards.

OUR PHILOSOPHY

Top functionality. Everything a driver needs must be standard feature: intercom, connections, earmuffs, drinking system, etc.

2009

Stilo develops ST-30, the world's first intercom featuring 2 circuits, one in use and one for backup. First World Touring Car Championship victory with Gabriele Tarquini.

2011

Stilo designs ST4 Zero and WRC DES Zero, world's lightest FIA 8860 certified helmets, both full face and open face. Verbacom launch: the very first communication system for racing with Bluetooth technology for mobile phone connection.

2013

Stilo develops the world first rally intercom with digital noise cancellation that debuts with Volkswagen winning the World Rally Championship in Sébastien Ogier's Polo WRC.

2015

Stilo officially debuts in F1. Update to the new homologation standards FIA8859-2015 and Snell2015. Stilo wins the 24h of Le Mans with Porsche - LMP1.

2017

In Formula 1 with Valtteri Bottas - Mercedes F1 Team and Jolyon Palmer - Renault F1 Team. Ear Bamber wins the 24h of Le Mans and the WEC title with Porsche - LMP1 wearing ST5. 5th WRC title for Sébastien Ogier and 1st for M-Sport. It's the 13th title in a row for Stilo.

2008

Birth of the ST4: Stilo professional helmet for racing. The world's first FIA8860-2004 certified racing helmet with earmuffs and integrated drinking system.

2010

Launch of the WRC DES, world's first FIA8860-2004 certified open-face helmet. New operations office in a 2.000 sq.m area. Energetically self-sufficient, carbon neutral on the environment. Launch of the ST30-DES, world's first rally intercom with Bluetooth technology for mobile telephones connection.

2012

Stilo into the Rally legend: eighth World Champion title won with Sébastien Loeb and Citroen. Stilo wins the GP2 main series with Davide Valsecchi.

2014

Birth of ST5, designed to be the benchmark in full face helmets. DG30, DG10 the world's first rally intercoms with noise digital active cancellation.

2016

Stilo becomes part of the Simpson Performance group based in the US. Development of a new racing communication system via radio for the PCCA Championship. Romain Dumas wins the 24h of Le Mans and the WEC title with Porsche - LMP1 wearing Stilo ST5. Jimmie Johnson of Hendrick Motorsports Champion of the NASCAR Sprint Cup Series wearing ST5. 4th WRC title won with Volkswagen Motorsport and Sébastien Ogier.

2018

ST5 Zero VB is the first FIA8860-2018 certified helmet and Valtteri Bottas is the world first driver to wear a FIA 8860-2018 ABP helmet during the Spa GP. WRC DES, ST5, ST5ABP: The whole range updates to the new FIA8860-2018 standard. Filipe Albuquerque wins Daytona Rolex 24H with Audi Sport Team wearing ST5 Zero. Stilo implements wireless technology in rally communications.

THE NEW STANDARD FIA 8860-2018

At the end of 2017 FIA released a new helmet standard that will become mandatory from season 2019 in Formula 1 and in the World Rally Championship for P1 crew.

“The current top-end helmets are already the safest in the world but the new standard will take them to the next level. It is important for all of our safety research that we continually strive to improve and this is why we are requiring all manufacturers to meet this tougher standard for our championships”. Former FIA Safety Director Laurent Mekies

The new standard, called FIA 8860-2018, offers a number of improved safety features: the increase in energy absorption, an extended area of protection for drivers and the ABP - Advanced Ballistic Protection, that you can see in the below comparative summary between FIA8860-2010 and FIA8860-2018.

	FIA 8860-2018	FIA 8860-2018 ABP
	Requires a pre-certification of the helmet	Stand-alone Standard ABP version & STD version
Linear Impacts	Headforms mass = 5Kg @ 9.5 m/s Peak deceleration < 300g	Variable mass headforms Peak deceleration < 275g Energy absorption increase of 12% and 22% for large helmet sizes.
Low velocity impact	-	Low velocity test @ 6 m/s to prevent “excessive” optimization at higher impact velocities.
Extent area of protection	-	To improve compatibility with modern cars which provide head support. [headrests and head protection systems].
Advanced Ballistic Protection * ONLY WITH FIA 8860-2018 ABP certified versions.	DESIGN STANDARD - Zylon panel to be added to increase protection for set categories.	PERFORMANCE STANDARD (ABP integrated into the shell) Ballistic test has been developed, based on military ballistic specifications. Projectiles weighing up to 225 grams, travelling at 250 kmh. Eyeport is lowered by 10 mm.

Stilo worked closely with FIA throughout this process and has been the first helmet manufacturer in the world to reach this exclusive standard with Stilo ST5FN Zero ABP 8860-2018, approved and certified by the FIA.

One of the most impressive innovations introduced by the new homologation is the ABP, acronym for Advanced Ballistic Protection, that was specifically thought for open cars to further strengthen the helmet in the forehead area, replacing the zylon panel currently in use for F1, F2, GP3 and Indycar. After the Halo cockpit protection system the new homologation was written to reduce the risk of injury from debris or other objects striking a driver's head.

FIA has made a plan of making the new standard mandatory for more Championships in different professional categories, in a 3 year time frame with the aim of making motorsport safer and safer as per the below chart.

FIA 8860-2018 / FIA8860-2018 ABP	
When	Where is it becoming mandatory?
2019	Formula 1, Formula 2, FIA World Rally Championship
2020	Formula E, WEC
2021	Formula 3

technical features

ADJUSTABLE PEAKS

The peak can be lowered allowing good visibility to the driver even when the sun is low on the horizon.

VISORS

High optical quality flipup visor (optional).

ADJUSTABLE SUNSCREEN

The sunscreen can be lowered allowing good visibility to the driver even when the sun is low on the horizon.

SHORT VISORS

High optical quality flipup visor (optional).

EARMUFFS

Certified for rally and racing use, they make the helmet perfectly soundproof. The pressure on the driver's head can be adjusted with special foam paddings of various thicknesses to be positioned with Velcro right behind the earmuffs.

ADJUSTABLE MICROPHONE

Dedicated spacers to adjust the position with respect to the driver's mouth come as standard equipment.

MICROPHONE HOLDER

Fixed in the helmet interior and realized with a special flex pipe able to grant maximum stability and precise adjustment.

THE STILO DIGITAL INTERCOM THAT HAS WON THE LAST 2 WORLD RALLY CHAMPIONSHIPS WITH VOLKSWAGEN

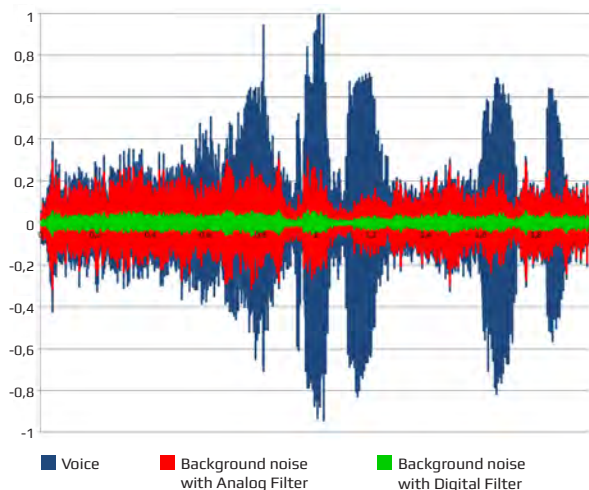

- Digital active noise cancellation with SDA filter
- Separate main intercom box which can be positioned under the seats to offer a lower center of gravity
- Remote control panel
- GSM module integrated into the intercom box with a SIM card slot (AB0600 only) or Bluetooth module (AB0601 only)
- Camera and radio connections

▷ AB0600	DG-30 GSM
▷ AB0601	DG-30 BLUETOOTH
▷ YB0600	helmets connection cable (not included)

DIGITAL ACTIVE NOISE CANCELLATION

Why Digital? The next generation of Stilo digital intercoms offers a dramatic step forward with its active digital noise cancelling. Digital, unlike the limited capabilities of old analog intercoms, has the capability of active digital noise cancelling, which in a millisecond can separate the vitally important sound of the drivers voices from the excessive bad noises of the engine, transmissions and road surface and filter these right down while improving the more important sound of the communications between driver and co-driver. A whole new world in rally sport communications is now available from Stilo.

DG-10

DEVELOPED DIRECTLY FROM DG30:
SAME DIGITAL ACTIVE NOISE CANCELLATION
WITH SIMPLIFIED FUNCTIONS

- Digital active noise cancellation with SDA filter
- Integrated Bluetooth for mobile phone connection
- Camera and radio connections

▷ AB0500 DG-10

WRC DES 9V

The best of Stilo's analogic noise cancellation available thanks to the "Extra Filter". Fed from the car power supply and 9V battery. Bluetooth connection with mobile telephones not available.

- The best analogic Stilo audio quality and the maximum ease of use at a price with no equal
- Camera or Radio connection
- Powered by a 9 volt battery or fed from the car power supply.

▷ AB0214 WRC DES 9V

Camera/Radio connection

Camera out (low or high level) or radio IN switch

Extra Filter even more effective. Moving the switch to "Extra Filter" the background noises are strongly damped and the co-driver voice's louder to the driver. Since the driver's voice sounds lower to the co-driver, it is recommended that the Extra Filter is set to off during transfers.

Plug

Sebastian Loeb - FIA World Rallycross Championship - TEAM PEUGEOT TOTAL

WRC 03

Specifically designed for roll-bars fitment. ON/OFF control with the co-driver plug-in (never to forget to switch the intercom off); separated volumes, 9 V standard power supply and 12 V available option. Stilo specific cables for fastening safety belts. Camera connection.

▷ AB0200 WRC 03

Camera connection

Plug

TROPHY 2

- Individual volume controls
- 9 Volt battery or 12 Volt optional adapter; wirings
- Camera connection
- ON/OFF Led
- High quality metal jacks
- Special design for roll-bar fitting.

▷ AB0102 TROPHY 2

Camera connection

Plug

OPEN-FACE KIT WITH EARMUFFS
WRC intercom kit for open-face helmets with earmuffs.

▷ AE0104

FULL-FACE KIT WITH EARMUFFS
WRC intercom kit for full-face helmets with earmuffs.

▷ AE0105

POWER SUPPLY
12V power supply for WRC 03 and Trophy intercoms.

▷ YB0100

WRC DES - TROPHY HEADSETS

Excellent noise protection, maximum comfort, "flex" boom, no joints.
WRC professional electronics (AD0210).
TROPHY professional electronics (AD0110).

YA0212

Spare hygienic kit for AD0210 and AD0110 headsets

FULL-FACE HELMETS KIT
Full-face helmet kit composed of ultra thin speakers, noise cancelling magnetic-dynamic microphone and professional jack (WRC connection).

▷ AE0102

OPEN-FACE HELMETS KIT
Same as the full-face helmet kit but with a flexible microphone boom.

▷ AE0103

ADAPTERS

- ▷ AC0100 Adapter Stilo Trophy Rally helmet / Terraphone intercom
- ▷ AC0101 Adapter Stilo Trophy intercom / Terraphone helmet

WIRING CONNECTION

- ▷ YB0307 Intercom - helmet extension cable 1.8 m.
- ▷ YB0317 Intercom - helmet extension cable 0.4 m.

FULL-FACE HELMETS KIT
Full-face helmet kit composed of ultra thin speakers, noise cancelling microphone and jack plug (Trophy intercom).

▷ AE0100

OPEN-FACE HELMETS KIT
Same Trophy intercom kit as the full-face version but with a flexible boom.

▷ AE0101

- ▷ AC0201 Adapter Stilo WRC intercom / Peltor intercom (or similar)
- ▷ AC0200 Adapter Stilo WRC intercom / Peltor helmet (or similar)

CAMERA CONNECTION

- ▷ YB0312 Wirings to connect cameras

EMERGENCY KIT

Spare electronics kit: it is like carrying a spare helmet in the co-driver bag.

ST5FN ABP

THE WORLD'S FIRST FIA 8860-2018 ABP CERTIFIED HELMET!

ABP is the acronym for: Advanced Ballistic Protection. The ABP replaces the current zylon panel required by FIA in the previous generation of FIA 8860-2010 helmets, integrating a stronger protection into the front part of the helmet shell. A brand new test was specifically introduced to test the area, based on military ballistic specifications with a projectile shot at a 250 km/h speed. ST5FN ABP is the first helmet to be certified to this new standard, offering a higher safety degree while maintaining dimensions and weight!

ST5FN ABP
ZERO

TOP AIR SYSTEM KIT

The exclusive Stilo "Top Air System" takes fresh air to the driver's head and nose. With the innovative system for the air flow regulation you can favor the air flow on the driver's face for a better breathing or for cooling the driver's head. The Top Air System can be fitted onto ST5 Formula and GT models. Thanks to the fixation system you can fit it more than once replacing the dedicated fixation tape.

With flow adjuster:

- ▷ **YA0833** Adjustable top air system sizes from XS 54 to L 59
- ▷ **YA0856** Adjustable top air system sizes from L 60 to XXXL 64

Without flow adjuster:

- ▷ **YA0834** Top air system sizes from XS 54 to L 59
- ▷ **YA0857** Top air system sizes from L 60 to XXXL 64

• ST5 RANGE

SIDE AIR SYSTEM

The driver can breath fresh air when driving in close cockpit cars. The air coupling for the helmet is made for tubes of a 20 mm Ø. Couplings are available for tubes with a different diameter, up to 32 mm.

car-pit

RADIO BASIC KIT & RADIO TEAM KIT

The radio kit is the basic configuration for the communication via radio between one car and the engineer at the box. The driver will have one radio, the connection wirings to his helmet, a car antenna and the PTT button to decide when to start and stop the communications. The engineer instead will have a portable radio with antenna and belt clip, one headset with a noise cancelling microphone and the connection cable for the portable radio.

The communication can also be extended from one engineer to more people at the box through the Radio Team kit version that features 3 portable radios for the pit.

Both versions can be prepared according to the type of car and to the type of radios devices that the team prefers: analogical, digital or digital advanced. GT cars can be equipped with a car radio, fed through the car battery while Formula single seaters will have a portable radio.

All kits come with a practical case for the transportation and the recharge of the radio devices and the headset. The radio programming software cables are always included as well to allow the maximum flexibility and ease of use in any race. Like with all radio systems, the BASIC and the TEAM kit can be implemented or integrated in a wider system, simply modifying the device programming.

• Basic kits:

- CQ0020/21/22: GT Single Car – Single pit – Analogical/ Digital/ Digital Advanced
- CQ0023/24/25: Formula Single Car – Single pit – Analogical/ Digital/ Digital Advanced.

• Team kits:

- CQ0026/27/28: GT Single Car – 3 pit – Analogical/ Digital/ Digital Advanced
- CQ0029/30/31: Formula Single Car – 3 pit – Analogical/ Digital/ Digital Advanced.

Car equipment

GT:

- Car transceiver system
- Wiring for the connection to the helmet, to the transmission button and the radio feed
- A car antenna
- A PTT transmission button

Formula:

- Portable device
- Case for the portable device
- Wiring for the connection to the helmet and to the transmission button
- A car antenna
- A PTT transmission button

Box equipment – 3 radios

- Portable system with battery, antenna and belt clip
- Headset with noise cancelling microphone
- Connection cable for the portable radio

Box equipment – 1 radio

- Portable system with battery, antenna and belt clip
- Headset with noise cancelling microphone
- Connection cable for the portable radio

CUSTOMIZED SYSTEMS

Radio kits can be customized upon request to make them suite the Team's different needs.

Contact our customer service at info@stilo.it for enquiries.

- CQ0000CUST

A case to easily transport and recharge all the radio devices and the headset is included with both the Basic and the Team kits

Radio systems – Features

- The radio system can be extended or modified anytime
- Each device can be set to listen and transmit through the desired channels
- Possibility to listen to more radio channels with one single system
- The configuration of the radio system can be modified programming the devices
- Coverage is independent from telephone lines and SIM cards
- Ease of use: you just turn on the devices and use them without further connections nor pairings

Plus of DIGITAL radios

- Better quality of communications thanks to the digital conversion and DSP organization
- Total absence of background crackles in case of poor signal
- Better signal/noise rate, frequency response and dynamic range
- High privacy level and possibility to encrypt communications
- Better use of the radio spectrum (2 contemporary communications on a single radio channel).

Plus of DIGITAL Advanced radios

Further to the digital radio advantages, the advanced system also allows:

- Multiple configurations of the radios (that can be quickly set through the keyboard to become, for instance mechanic – engineer – d.s. – tyre changer, etc)

- Keyboard personalization of radio functions and options
- Better integration in complex radio systems
- The display of the name of the radio that is transmitting.

Possible integrations:

- For any radio systems transmission links can be implemented to noticeably increase the range
- Audio accessories interchangeable for the box radios, headsets, various headsets, audio kits for the engineers' helmets etc
- Multi PTT keyboards for the direct transmission through the desired channel
- Modifications or customizations can be made on demand.

Frequencies:

Radio systems can be supplied in VHF or UHF professional civil bands.

THE USAGE OF RADIOELECTRICS TRANSCIVERS IS SUBJECT TO THE LICENSE REQUEST AND PAYMENT OF THE RELEVANT FEE.

VERBACOM CLUB Bluetooth

Car equipment

The club unit is totally transportable for use in any vehicle or kart. The main Bluetooth unit (1) is self-powered and connects to a mobile phone (mobile phone not supplied) which is mounted in the car. This unit has volume controls and a visible system status light for the driver, and also an on/off switch. This weighing just 66 gr and measuring 74 x 47 x 15 mm it is extremely small and light. Helmet wiring (3) with an extension cable connects into the driver's helmet (AE0300 and AE0315 are required should your helmet have no wiring).

The first car to pit communication system using mobile phones

Advantages

- **Licenses:** there is no need for a license as it uses mobile telephone Sim cards.
- **Full Duplex:** while also totally private and secure, the both phones allow each of the crew to talk at the same time.
- **Coverage:** unlike temperamental radio systems, the Verbacom allows communication on any length of circuit as it uses mobile phone signals.
- **Clarity:** using digital noise cancelling the communications give excellent voice clarity, which has been tested in F3 to F1 cars, and GT to Le Mans vehicles.
- **Easy to Use:** this unit has been designed around professional motorsport, and is extremely easy to use and setup. Simple and very very effective.
- **In Car:** the driver does no more than plug in and drive. Thanks to the digital noise cancellation that cancels all background noises, there's no need to use a PTT button and the driver can speak anytime.
- **Lightweight and Compact:** the Verbacom is very lightweight in comparison to normal radio systems giving performance all round.

Verbacom CLUB available versions:

- CQ0008 - Single Car to Single Pit Headset without phones
- CQ0009 - Single Car to Two Pit Headsets without phones
- CQ0010 - Two Cars to a Single Pit Headset without phones

How it works

Verbacom offers drivers a cost effective and very efficient car to pit communication system by using mobile phones. The Pit wall phone calls the car phone before the car starts, the car unit is programmed to automatically answer and the phone call is kept open keeping the car and Pit unit continually connected until switched off. The communication between units is always open, the pit crew press the push to talk button on the headset to transmit to the driver, whilst the driver can simply speak without pressing any button thanks to the digital noise cancellation that cancels all background noises. If for any reason the signal is lost and call is dropped? The pit phone automatically calls the car which answers it for the driver. It is as easy as that.

Pit equipment

- Noise reduction headsets are self powered and have either a single or double Bluetooth unit subject to the system you buy. These connect to a mobile phone (not supplied) by Bluetooth for communication with the car, or wirelessly to the second pit headset (1).
